

Technical Data Sheet

MATERIAL:	Epichlorohydrin/ethylene oxide copolymer
CATALOG NUMBER:	155
CAS NUMBER:	24969-10-6
DESCRIPTION:	Random copolymer of epichlorohydrin and ethylene oxide
FORMULA:	$(C_3H_5ClO)_m(C_2H_4O)_n$
TYPICAL PROPERTIES:	
Appearance:	Slab
Epichlorohydrin content:	65%
Mooney viscosity:	100
Density:	1.4
Solubility:	Insoluble in water

GENERAL INFORMATION: Epichlorohydrin/ethylene oxide copolymers exhibit good low temperature flexibility, oil and solvent resistance and good compression set. They have been used in a variety of areas including automotive, refrigeration, sealing and hose applications.

STRUCTURE:
