## **Technical Data Sheet**

**MATERIAL:** Polyethylene, oxidized

CATALOG NUMBER: 405

**CAS NUMBER:** 68441-17-8

**DESCRIPTION:** Oxidized polyethylene

FORMULA: Unspecified

**TYPICAL PROPERTIES:** 

Appearance: Pellets

Acid number: 16mg KOH/g Density: 0.93 (20°C) Brookfield viscosity: 200 cp (140°C)

Softening point:  $104^{\circ}\text{C}$ Flash point:  $> 490^{\circ}\text{F}$ 

Solubility: Insoluble in water

**GENERAL INFORMATION:** This product is an oxidized, low molecular weight homopolymer of

ethylene. It has been primarily used as a highly effective lubricant for

use in processing polyvinyl chloride.

**STRUCTURE:**
